

Section 1 **Communications**

As an IT Professional, you are expected to be able to communicate over a variety of network methods, FTP, SSH, etc.

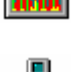

This section includes a set of communications programs and utilities to help you achieve excellence in this area.

	FileZilla Server	Full-featured FTP Server
	Baby FTP Server	Quick & Easy FTP Server
	Portable FileZilla	FTP Client
	Portable Putty	SSH Client
	uTorrent	BitTorrent Client
	tftpd32	TFTP and Simple FTP Server
	HFS	HTTP File Server
	VNC Viewer	VNC Client Viewer
	HyperTerminal	Personal Terminal Application
	WinVNC	VNC Server & Client
	Tera Term Pro	Full-function Terminal Emulator
	Torpark	Firefox using TOR (Onion Routing)

Section 2 Network Analysis

We have included a wide variety of tools for Network Analysis, from simple scanners, to an entire Linux system, to packet capture and display tools, to full-functioned network analysis toolsets.

All of these require you to have a fairly robust understanding of the entire TCP/IP stack

	\$\$ NetScanTools Pro	Full-Featured Network Analysis Toolset
	\$\$ 'The Network Toolkit'	Set of Windows Tools w/Linux Emulator
	Wireshark	Network Protocol Analysis
	Network Scanner	Easy Network Scanner
	Hover IP	Quick, Simple IP Information
	3d Traceroute	Visual Traceroute & Tools
	AdapterWatch	NIC Statistics
	CurrPorts	Listing of Listening Ports
	IPNetInfo	Quick IP Information
	Angry IP Scanner	Fast Ping-Sweep
	NetMeter	Track Network Throughput
	TCPView	What Ports are Open
	Network Stumbler	Wireless AP Scanner
	Win32Whols	Easy Whols Lookup

	MyPersonalSpeed	Track & Document Internet Access Speed
	WhoAmI	Current IP Connectivity
	WinIPS	Change IP Network Connections
	TCP Net View	Quick SMB Network Devices
	Convert IP	Convert IP Addresses
	SuperScan 4	Network Scanning Tool
	ARP Cache Watch	Track changes in ARP Cache
	Sam Spade	Network Reconnaissance

Section 3 **Portable Applications**

You might not always have your laptop, and all the applications contained therein, but with your trusty 'Ultimate USB' you can always have usable competent applications with you.

In this section we have included a wide variety of applications an IT Professional might find useful: Open Office, Instant Messaging, Password Tracking, PDF reader, graphics viewer, and even a website editor.

	Portable Open Office	Full Featured Office - Including; Word Processing, Spreadsheet, Presentations, Drawing and Database
	\$\$ Dmailersync	Synchronize Outlook (Express) for localized Contacts, Calendar, Tasks and Email on the go
	Portable GAIM	Flexible Instant Messaging Client
	Portable Miranda	Instant Messaging Client
	Portable VNU	Website WYSIWYG Editor
	Portable Firefox	Localized (leave no trace) Internet Browser w/Plugins
	Portable FileZilla	Full-featured FTP Client
	Portable AbiWord	Full-featured Word Processing
	Foxit Reader	PDF Viewer
	Essential PIM	Full-featured Personal Information Manager
	FastStone Image Viewer	Graphics of all types Viewer
	\$\$ Lexar Secure II	Create and use an encrypted partion on USB drive
	Skype	Free Voice over IP phone client
	VLC	Media Player

	ZoomIt	Screen Magnifier
	Audacity	Audio editing suite
	GIMP Portable	Graphics and Photo Editor
	WordPad	Simple Word Processor
	Scribus	Page Layout Program
	AVS DVD	DVD Player

Section 4 Service & Support

These tools are designed to help the IT Professional in the setup and support of a variety of computer systems. You might be setting up a new system, helping a friend or relative fix their computer, or even one of your own.

Here you'll find tools to make the support, recovery and maintenance of computers easier and quicker.

	\$\$ Invisible Secrets	Hiding information - Steganography
	\$\$ System LifeGuard	Full-Featured Systems Utility Set
	\$\$ SpaceMonger	Graphical Viewer of File Systems
	SpyBot	Spyware Remover
	Ad-Aware	Adware & Spyware Remover
	Portable ClamWin	Anti-Virus
	Autostart	Set Bootup and Autoload Programs
	System Information	Full detailed auditing of system configuration
	HoverSnap	Screen Snapshots
	Process Viewer	What is using the computers cycles
	File System Monitor	Watch changes to files and folders
	Registry Monitor	Manage and track changes to Registry
	Timer	Simple on-screen timer software
	WinAudit	Audit of installed services & software
	WhoAmI	Information on IP Network Connection

	Stinger	Anti-Virus
	DOS Box	Windows Command Processor
	AntiVirGuard	Anti-Virus
	A2Hijackfree	Configure Autoruns
	Restoration	Return erased items
	ZoomIt	Screen Magnifier
	Remove WGA	Help manage Windows Genuine issues
	7-Zip	Zip File Manager
	MacMakeup	Spoof MAC Addresses
	Registry Scanner	Find settings in the Registry
	StartupRun	What programs should run at boot time
	WinFingerPrint	Versions of Windows
	Clear Programs	Remove Histories from a variety of programs
	Disk Cleaner	Clear out unwanted 'extra' files
	MM CompView	What Multi-Media Codecs are installed

Section 5 Security

A large part of every IT Professional is dealing with security issues, here you'll find tools to help test, tighten, and troubleshoot security on networks as well as computers.

Note: Some of these might 'trip' virus protection - that is because they might be classified as a 'hacker' tool.

	\$\$ FTK Imager	View and snapshot entire filesystems
	Password Revealer	See what is behind those *****s
	Keepass	Password Manager
	KL Detector	Detects Keyloggers on System
	SMAC	MAC Address Spoofer
	TrueCrypt	Encrypt partions on USB Drive
	Steganos LockNote	Simple Encrypted Text File Program
	fSekrit	Encrypted Text Files
	CAIN	Full-Featured Password Recovery Utility
	avKill	Stop Anti-Virus from tripping on 'Hacking' Utilities
	IE HistoryView	View Internet Explorer Histories
	IE Password Viewer	View Internet Explorer Passwords
	Mail Password Viewer	Recover Mail program passwords
	IM Password Viewer	Recover Instant Messaging Passwords

	Network Password Viewer	Recover Network Passwords
	ProduKey	Recover Microsoft Product Keys
	Protected Storage PassView	Recover passwords and information from Protected Storage
	WinUpdatesList	List all Windows Updates on target computer
	Asterisk Logger	Show what is behind the *****'s in passwords
	SniffPass	View passwords over the network
	WirelessKeyView	View wireless WEP and WPA Keys
	List USB Devices	Lists all USB devices inserted in target computer
	Outlook PST Viewer	Recovers Outlook PST passwords
	LSA SecretsView	View Passwords from LSA
	NetResView	View target computer's network neighbors

Section 6 Reference & Education

An IT Professional needs a variety of reference documents at their disposal. Here is a start and a collection. Please feel free to add documents here to help you in your specific industry.

We have also included a few educational programs and calculators to help you on your career.

	Engineering/Scientific Calculator	Complex Math Calculator
	Converver	Convert a wide variety of measurements
	XCALC Calculator	Calculator
	Convert Units	Converts units of different values
	Periodic Table	Online Interactive Periodic Table of the Elements
	Solar System Viewer	Interactive Graphic Viewer of Solar System
	The Sage - Dictionary & Thesaurus	Dictionary and Thesaurus
	Google Cheat Sheets	
	Keyboard Shortcuts	
	OSI and TCP/IP Models	
	Linux Quick Reference	
	Registry Quick Find	
	Hexadecimal Conversions	

Section 7 Games

No computer person is totally complete without a couple of computer games at their fingertips. We've included a small subset - but enough to start you wasting time wherever you might be.

Enjoy!

	Sudoku	Graphical Sudoku Game
	Bricks	Brickout type Game
	Mazes	Maze Builder Game
	NagaSkaki Chess	Full-Featured Chess
	Othello	Othello Game
	Risk	Game of Risk
	Pawn Chess	Simple Chess
	Nmania Minesweeper	MineSweeper Game
	Uno	Uno
	Titanion	Shoot down invaders

Section 8 **Minimum Install**

This section of the USB stick is a 'placeholder' for you to include the software you normally install during the initial setup of any computer. This might include PDF readers, graphics viewers, standard utilities, things you might want to have on any computer.

Because of licensing issues, you can easily download and store here the installation files for any of your 'minimum install' set. (we can't legally provide these for you... but we left you this space)

MySpeed Personal Edition	http://www.myspeed.com/pe/index.html

Section 9 **Attack & Recovery**

This section is a sub-set of the Security Section - a few tools that can be easily run from an 'Attack' Stick.

Our 'Attack Stick' has two purposes. The first is as a Self-Booting Linux system. If your Windows computer is 'sick' and you need to still access files, boot from this USB stick directly into Linux. It contains a simple graphical interface as well as tools to help you recover important data, or reset Windows passwords.

As a Windows USB - upon insertion in a target computer - it goes about gathering password and details about the user and items on the target computer and save them in the \WIP\Dump directory for later viewing and analysis.

ONLY USE THIS WITH PERMISSION!

You may also 'DisArm' this USB and then only use these tools in a 'manual' mode.

	avKill	Stop Anti-Virus from tripping on 'Hacking' Utilities
	IE HistoryView	View Internet Explorer Histories
	IE Password Viewer	View Internet Explorer Passwords
	Mail Password Viewer	Recover Mail program passwords
	IM Password Viewer	Recover Instant Messaging Passwords
	Network Password Viewer	Recover Network Passwords
	ProduKey	Recover Microsoft Product Keys
	Protected Storage PassView	Recover passwords and information from Protected Storage
	WinUpdatesList	List all Windows Updates on target computer
	WirelessKeyView	View wireless WEP and WPA Keys
	List USB Devices	Lists all USB devices inserted in target computer

Outlook PST Viewer

Recovers Outlook PST passwords

LSA SecretsView

View Passwords from LSA

NetResView

View target computer's network neighbors
